Anuranjan Dubey

Summary: *AI, Machine Learning and Backend Development*
SWE-2 @Intuit

Education

Arizona State University Master of Science, Computer Science *August 2023 - May 2025*
Artificial Intelligence, Distributed Database Systems and Info. Assurance & Security, **GPA: 4.22/4.0**

UC SanDiegoX's Data Science MicroMasters Program *July 2022 - August 2023*
On edX, *Probability and Statistics in Data Science, Machine Learning, Big Data Using Spark*

Jaypee Institute of Information Technology, Noida, Uttar Pradesh, India
Bachelor of Technology, Computer Science and Engineering, GPA: 7.3/10 *July 2017 - August 2021*

Technical Skills

Languages/Frameworks: Python, Java, C++, SQL, Bash, HTML/CSS/JS, FastAPI, Flask, Spring Boot, React Native, TensorFlow, PyTorch, Keras, OpenCV.
Cloud/Data/Tools: AWS (EC2, S3, Lambda, DynamoDB), Databricks, Kafka, Docker, Jenkins, PostgreSQL, MongoDB, MSSQL, Git, Linux, REST/GraphQL APIs, CyberArk, Azure AD, Datadog, Wavefront, Splunk, CI/CD, Distributed Systems, DevOps.

Experience

- **Intuit, Software Engineer 2** *May 2025 – Present*
  - *Designing resilient, event-driven services for QuickBooks Online, leading cross-functional initiatives that drive measurable customer and revenue growth.*
- **Intuit, Software Engineering Intern** *May 2024 – Aug 2024*
  - *Built scalable data pipelines using DynamoDB, Apache Kafka, and Databricks with IEDM schema and outbox pattern for event-driven data integration.*
  - *Developed real-time observability dashboards in Wavefront and Splunk for Java Spring Boot services deployed via Podman on AWS.*
  - *Enabled up to $10M impact and 80% user growth opportunity, contributing to a larger $80M annual revenue initiative.*
- **Genpact, Senior Associate – Data Engineering** *Jun 2021 – May 2023*
  - *Integrated 500+ indicators from WB, IMF, OECD, and Eurostat to improve analytical accuracy across cross-vertical financial dashboards.*
  - *Designed architecture docs and optimized API calls, reducing server load by ∼30%.*
  - *Collaborated across teams using Python, FastAPI, MSSQL, CyberArk, and Microsoft Graph to enhance platform reliability.*
- **Filed, Software Developer**
  - *Developed integrations for AWS Marketplace, Shopify, and Magento using Flask, GraphQL, and SQL to automate product catalog sync.*
  - *Containerized deployments with AWS SAM and Docker, ensuring scalable microservice delivery.*

Research

Cost Efficient Defect Detection in Bangle Industry Using Transfer Learning *Nov-2022*
Springer, Communications in Computer and Information Science (CCIS)
Accepted in 7th International Conference on Computer Vision & Image Processing.

Project Experience

- ***Oil Storage Tank Monitor (WIP)*** ***Spring 2025***
  Containerized FastAPI + Celery + React platform monitoring floating-roof oil tanks using CV/ML pipelines and spatial analytics.
- ***Fake Reviews Detection (SOMTE)*** ***Fall 2024***
  Benchmarked classical ML and deep learning pipelines to detect synthetic vs human-written reviews across 40k samples.
- ***SFTP and API FileSync with Notification*** ***Fall 2022***
  Orchestrated approach, offering centralized management. Implemented non-user process with automated notifications for failed syncs to respective owners, using Active directory and Microsoft Graph API.
- ***Qlik Management Console Notification Service*** ***Spring 2022***
  Automated detailed failure notifications via email. Orchestrated seamless data updates in SQL Server and integrated Azure Active Directory for enhanced authentication with CyberArk.
- ***Ticketly: A Smart, Scalable Ticket Booking System on AWS*** ***Fall 2020***
  A Ticket Booking Service using FastAPI, SwaggerUI and DynamoDB with AWS Auto Scaling.
- ***FindMyFunds: Querying US Funds Streamed via Kafka*** ***Summer 20***
  A Kafka enabled microservice querying Yahoo Finance data from MongoDB.
